

Several hundred thousand years after BIG BANG.

- Atoms form.
- Specifically hydrogen with small amounts of helium.

Early universe:

- 75% Hydrogen
- 25% Helium

1 proton
1 electron

2 protons
2 neutrons
2 electrons

100-400 million years after BB

- 1st stars and galaxies form.

4.6 Billion Years Ago

- Our solar system forms.
